

FITTING INSTRUCTION

for decorative elements mounted around lamppost

1. Insert support's long arm into the guide placed on the element.

Fastening supports

support fastening

fastened supports

2. Press the supports against the lamppost and adjust their lengths to place the element in the position that is central in relation to the post, and then clamp the whole construction with two tie wraps.

Tie wrap

3. Where there is an opening in the guide, drill through the long arm of the fastening support, to screw the arm and the guide together.
